Work Experience ────────────────────────────────

Sustech Engineering (Software Engineer Intern)   *Perth WA*

                                                                                                                   Dec 2023 - Jun 2024
- I am part of a 6-member team utilizing PHP and Laravel to transform Word and Excel form files into a web-based format. The system is integrated with a MySQL database, allowing users to input data directly on the website for simplified and efficient data storage.
- QHSC Project
  - Transitioned form processing from Excel and Word to web-based platforms.
  - Reduced user input errors by 30% through enhanced validation and automation.
  - Implemented a user-friendly lookup feature for viewing form submissions and saving progress.

Gelare (Barista)   *Perth WA*

                                                                                                                    Dec 2022 - present
- As a barista, I prepared coffee and other beverages quickly and effectively while maintaining a professional appearance and delivering excellent customer service.

Super Tetsudo (Team Lead Sushi Maker)   *Perth WA*

                                                                                                                   May 2020 - Dec 2022
- In a fast pace environment, It was my responsibility make quality sushi as efficiently as possible, while also managing the sushi team consisting of 6 people.

Side Project ────────────────────────────────

Portfolio Website   *React, TypeScript, Next.JS*

- Developed a portfolio website using React, TypeScript and Next.JS, showcasing personal projects and experience.
- Utilized responsive design techniques to ensure optimal display on various screen sizes.
- Implemented various animation effects using the Framer Motion library.
- Implemented features such as resume download and a contact form using email JS.
- Managed version control with GitHub and implemented automated CI/CD deployments on Vercel.

Capstone Project (Team Project)   *React, Javascript*

- Collaborated with a team of 6 to deliver the Enrolment and Availability Tracker Project.
- Conducted regular client meetings to understand their requirements and ensured their needs were reflected in the project deliverables.
- Employed formal development procedures, including code sharing and merging via BitBucket, adhering to an Agile development methodology for efficient project management.

YouTube Clone   *React, TypeScript, Vite*

- Created the YouTube home page clone using advanced CSS and React techniques.
- Implemented a complex sidebar, search bar, and category pill with seamless responsiveness across all screen sizes.
- Enabled video previews on hover for an enhanced user experience.
- Managed version control with GitHub and implemented automated CI/CD deployments on Vercel.
